# PRODUCT VALIDATION

- Thoroughly examine circuits to ensure proper fit and electrical connectivity
- Perform a high voltage test
- Assess conductor resistance, voltage drop, and heat resistance
- Carry out an endurance test
- Maintain a comprehensive Quality Lab facility, essential for high-quality wiring harness production

**TENSILE &  
ELONGATION  
TESTING**

**KELVIN BRIDGE DOUBLE**

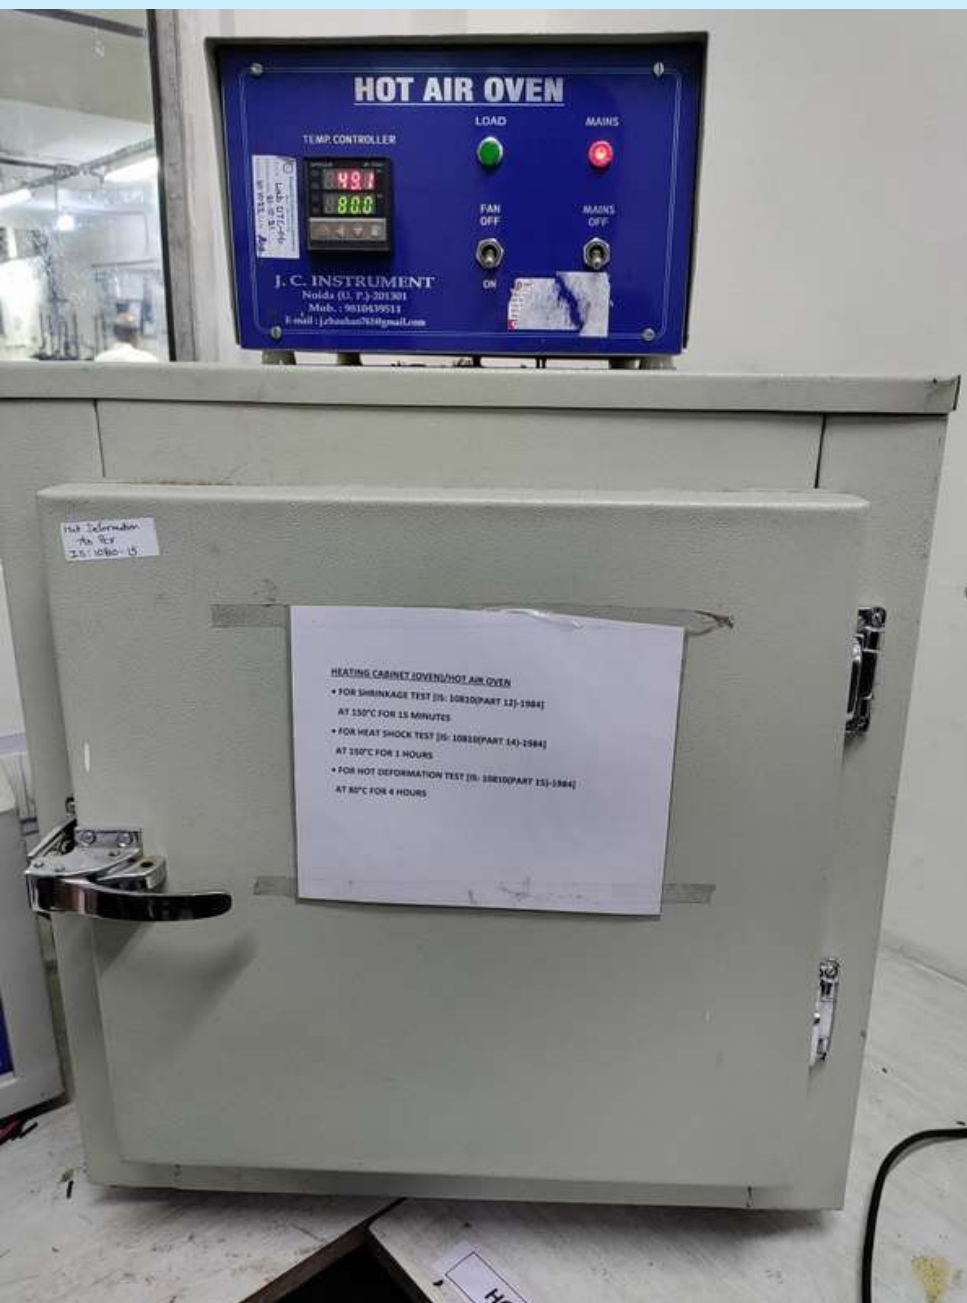

**DC HIGH VOLTAGE TESTER**

**MILLION MEGA OHM METER**

# Top Quality Testing

**HOT AIR OVEN**

**HUMIDITY CHAMBER**

**AGEING OVEN**

**H.V. TESTER**

**THERMAL STABILITY  
APPARATUS**

# COST-EFFECTIVE PRODUCTION

- Being involved in the motorcycle industry instills a mindset of cost-consciousness.
- Cost-Effective Design Solutions:
  - For Existing Products: Ongoing VA/VE suggestions provided to clients
  - For New Products: Simultaneous evaluation of specifications with the provision of cost efficient alternatives
- A culture of continuous wage productivity improvement ingrained within the organization, potentially resulting in the most competitive conversion costs in the Indian industry.
- Fully integrated in a backward manner: We possess capabilities for designing, developing, and manufacturing connectors, terminals, and various plastic components.

# AREA OF CONCENTRATION

- **Ongoing "Technology Upgrade Plan" Implemented Across:**

1. Design
2. Validation & Testing
3. Process
4. Materials

- **Emphasis on Exporting and Expanding Overseas Operations**

**We place a strong focus and priority on exporting our products and expanding our business operations in foreign markets or overseas locations. It underscores the importance and dedication of the company to engage in international trade and grow its presence beyond the domestic market.**
